Cobra™ 10/200 black

Flexible security on the road

Whether it's a joyride, a long-distance trip or an everyday short trip: When the engine is off, the helmet comes off. Then safe storage is required.

The ABUS Cobra steel cable ensures that your helmet and accessories are reliably waiting for you where you need them when you return: on your bike. The two loop ends are practical, you simply pull your motorbike lock through there - done. Thanks to the durable synthetic coating, the paintwork on your machine will not be scratched. And what's more: The ABUS Cobra is available in various strengths and lengths. You cannot and do not always want to carry your helmet with you as soon as you have parked your motorbike. With the Cobra steel cable from ABUS, you can use a solution that is as simple as it is effective. You have to lock your bike anyway. There is hardly any additional effort to pull your lock evenly through the loops of the Cobra. You can choose the length of the fuse cable to suit your needs. The ABUS Cobra is also suitable for many other security purposes - both at home and on the move.

Technologies

- High quality steel cable with two loop ends
- Synthetic coating to prevent damage to the bicycle‘s paintwork

Operation and use

- Additional security item to secure components
- Multiple purpose cable for garden, house, leisure activities and work

Tips

- The Cobra-Loop-Cables are a very useful complement for U-shackle, frame and padlocks
