

THE SIMPLE SOLUTION

With the ABUS SHIELD™ 565 Frame Lock, you can secure your bike against theft quickly and easily

You do not always need a chain lock or U-lock to secure your bike. In some situations - in particular where the risk of theft is low - it can be enough to secure the bike with a frame lock. The ABUS SHIELD™ 565 Frame Lock is mounted directly on the bike and can be locked with a single hand movement. Securing your bike does not get quicker and easier than that! The 8.5mm shackle, for example, provides great protection for low-cost bikes.

Technologies

- 8.5 mm thick locking shackle
- The shackle, the case as well as supporting elements of the locking mechanism are made of special hardened steel
- In the R version, the key remains in the cylinder when the lock is opened; in the NR version, it can be pulled out

Operation and use

- Good protection at low theft risk
- Recommended for the protection of low-range bicycles

Tips

- Frame locks are a convenient protection against unauthorized use of the bicycle
 - The use of a second lock besides the frame lock is highly recommended
