

TESTED SECURITY

The Chain Lock Steel-0-Chain™ 880 boasts the ABUS test seal for the ice spray test and the OSIMZ Moscow test mark

In order to make our bike locks as safe as possible, we routinely carry out tests and attacks in ABUS's own testing and certification laboratory that replicate possible theft conditions. This ensures that our locks are of consistent quality. The Steel-0-Chain™ 880 Chain Lock has security level 8 and has two additional test seals to its name.

Technologies

- 7 mm thick square chain with textile sleeve prevents damage to paintwork
- The chain, the lock body and supporting elements of the locking mechanism are made of specially hardened steel

Operation and use

- Good protection at medium theft risk
- Recommended for securing good bicycles
- The longer the chain, the easier the bicycle can be locked to a fixed object

Tips

- Very easy handling, because only one end of the chain has to be locked
-
