

370 Trigger Alarm 2.0 red

LEAVES THIEVES WITH RINGING IN THEIR EARS

With the Trigger Alarm 370 2.0, you enjoy double the security: thanks to the tried-and-tested ABUS locking technology and a loud 100 dB alarm.

The locking bolt of the Trigger Alarm 370 2.0 can withstand a lot with its 10 mm hardened special steel. The housing and structural parts of the locking mechanism are made of the same tough material. Double bolting with a T-bolt prevents attempts to break the lock open by spreading. This bolt anchors itself transversely in the lock body after locking and thus resolutely resists attempts at theft.

In addition, the Trigger Alarm 370 2.0 brake disc alarm protects your scooter or lightweight motorbike with an electronic alarm unit that is triggered by a vibration detection system. Simply lock it, set it to "On" and know immediately within earshot if someone tampers with your bike without authorisation.

Technologies

- 10 mm locking bolt
- Double bolting thanks to the T-bolt, which anchors itself in the lock body after locking and prevents attempts to break the lock open by spreading
- The bolt, housing and structural parts of the locking mechanism are made of specially hardened steel
- Alarm function based on a vibration detection system
- Alarm function with at least 100 dB
- An "On/Off" position allows the lock to be transported in the closed state without activation
- A special acoustic signal indicates the battery and activity status
- Two keys included
- A CR2 standard battery to power the electronics unit is included in the scope of delivery

Operation and use

- Basic protection where there is a low theft risk

370 Trigger Alarm 2.0 red

Seite 2 von 2

-
- Recommended for securing light motorbikes and scooters

Tips

- Disc brake locks are the most compact category of motorbike locks and are therefore easy to transport
- To increase security during longer parking times, it is recommended to also secure the motorbike to a fixed object
