

FLEXIBLE THANKS TO STAINLESS STEEL CABLE

ABUS aluminum locks made of Titalium™ material are suitable for a wide range of applications.

The small and maneuverable locks have a flexible stainless steel cable instead of a rigid shackle. This makes them ideal for hard-to-reach eyelets or multiple locking points next to each other. For example, they secure fittings, shed doors, basement windows, or switchgear. With the lock number on the key, it is convenient to make more keys.

Technical data - 72/30CAB20 red

Depth e	16 mm
Height f	137 mm
Keyed alike	No
Locking type	key
Security Level Home Security	4
