The ABUS Network Video Recorder (NVR) reliably records video streams from up to 32 cameras.

The ABUS NVRs stand out thanks to their simple and flexible operation and can be integrated into any project as a scalable recording solution.

Convenient operation

The cameras can be set up in the recorder in the blink of an eye thanks to the intuitive installation assistant, while the clear menu enables quick and easy programming. All ABUS cameras are deeply integrated via protocol and therefore offer full functionality.

Free choice when operating

The local menu in the live view is easy to navigate and structured in a self-explanatory way. The recorder can also be accessed via web browser, ABUS CMS software or app if preferred.

ABUS Link Station

The ABUS NVRs support the ABUS Link Station service. This allows easy set-up in the app; the NVR can be accessed from the Internet without cumbersome port forwarding. The service also offers a solution if the location only has an IPv6 Internet address.

Technologies

- Live view and recording of up to 32 IP cameras @ 8 MPx (4K)
- High-performance network data throughput with up to 576 MBit/s (320 MBit/s in / 256 MBit/s out)
- Easy operation locally on the device, via web browser, ABUS CMS software or app
- Local monitor output supports up to 8 MPx (4K) resolution
- Manual or controlled recording according to time plan, motion detection, alarm input or VCA
- Supports H.264 and H.265 (incl. dynamic GOP)
- Recording on up to 8 SATA hard drives
- Redundant data recording via RAID (Level: 0, 1, 5, 10)
