ABUS Mifare Desfire EV1 Diskus Transponder 4K (Security)

The contactless "key" for wAppLoxx
The read-protected Mifare Desfire EV1 transponder enables wAppLoxx double knob cylinders to be operated conveniently and securely: Just hold the stylish ABUS Diskus design transponder in front of the knob to feel the ease of opening with wAppLoxx. The robust transponder can easily be carried on the bunch of keys.

Small transponder, high level of security
Should the transponder become lost, it can be rapidly deactivated via app or the web interface of the wAppLoxx Control. Using the individual and clear numbering system, each transponder can be clearly identified. There is the option to train the cylinder for any number of different wAppLoxx locking systems.

Technologies

• Transponder for touchless opening of the wAppLoxx double cylinder
• Robust and in ABUS Diskus design
• Each transponder is unique and therefore read and write protected
• In case of loss, user simply and easily blocked by app/browser
