

THE TRADITIONAL APPROACH

No one wants to let uninvited guests into their home. Protect yours with this traditional door chain with integrated childproof safety catch.

The chain is made of welded steel. It is inserted into a robust cast iron rail. The door chain enables the house or flat door to be opened a crack wide. A spring in the rail protects against children opening the door without permission.

Technologies

- Welded steel chain
- Childproof lock: spring-loaded bolt
- Integrated chain support
- Cast rail

Operation and use

- House entrance doors and flat entrance doors

Variants
