

GSM Antenna (white)

Security Tech Germany

Art.-Nr. AZ6310W

Seite 1 von 1

The external GSM antenna is installed externally to the Secvest alarm panel housing. This improves GSM levels in unfavourable conditions.

Observe the following positioning and installation instructions in order to achieve a strong signal:
• Place the antenna as high up and as far away from the alarm system as possible.
• Maintain a distance of at least one metre from metallic objects.
• Ensure that at least 25 cm of the cable is routed horizontally away from the antenna.

Technologies

- Optimises the GSM reception of the Secvest GSM module (ESM05000x)
- Flexible installation thanks to a 3 metre cable
- Colour: white

Technical data - GSM Antenna (white)

Cable length	3 m
Cable type	RG174U
Compatible with	ESM050000
Connections	MMCX
Height	12 mm
Impedance	50 Ω
Length	2 mm
Width	220 mm
