

SOUNDS AN ALARM

Unauthorised opening of this window handle causes a loud alarm to sound.

Double the security: Equip your windows with this window handle and you can breathe easy. It is not only secured with a key, but also has an alarm function. The window handle is universally applicable, it can be attached to windows made of aluminium, plastic or wood. The alarm function sounds at 110 decibels. Thanks to 3D magnetic field sensors, false alarms can be ruled out. The window handle serves both as a childproof safety catch and as protection against burglars.

Technologies

- Activated pressure cylinder prevents opening of the window handle and arms the alarm function
- Individually adjustable, secured square bolt
- Keyed-alike combination possible with other ABUS security devices
- Integrated 110dBA (+/- 2 dBA) alarm siren as used in the Detecto 7000
- Standard alkaline batteries (2 x AAA), replaceable, battery life of up to two years
- Glass break detector available as an option (GBM7300)
- According to DIN18267 class 2
- 200Nm resistance against twisting and tearing off
- Made in Germany

Operation and use

- Parts for tilt-and-turn windows, patio doors as a stand-alone solution

- Electronic monitoring of windows and patio doors
- Arming and disarming by means of the pressure cylinder
- 3D magnetic-field sensor technology - alarm will not be triggered by strong winds, the thud of balls, etc.
- Also suitable as a child lock
- DIN left and DIN right mounting can be used

Variants

- Colours: white, silver

Technical data - FG300A silver

Locking type	key
Security Level Home Security	7
Weight	714 g
Window type	Balcony door / patio door, Single casement window, Basement window
alarm function	Yes
colour	silver
