

FINGERS INSTEAD OF KEYS

This keyless folding lock shows how convenient security can be:

Want to never rummage for your bike key again? You can. With the BORDO One 6000AF, your fingerprint is now all you need to open the lock quickly. One touch and the bike lock is unlocked. A total of eight fingerprints can be memorised.

The smart upgrade for our classic BORDO folding lock opens up even more possibilities: Operate the lock with the free ABUS One app or authorise other people to access it.

Steel-hard material and a loud alarm ensure the security your bike deserves. The lock's robust bars have a soft coating to prevent damage to the bike. With its 120 cm locking circumference, the lock can also be conveniently placed around bulky objects. For transportation, you can simply fold it up and store it in the lock holder supplied.

You always have the most personalised key with you: Put your finger on it and off you go.

Technologies

- 5 mm thick bars, extra-soft coating to prevent damage to paintwork
- Open without a key via fingerprint and the ABUS-One app
- Simple and secure integration of multiple users – up to 8 fingerprints can be memorised and additional users can be invited via app
- Practical 120 cm closing circumference

BORDO™ 6000AF/120 + Bracket SH

Seite 2 von 2

-
- 3D position detection – detects vibrations and the smallest of movements in all three dimensions and triggers an alarm
 - Smart alarm – the lock only emits a short warning tone in the event of minor and brief vibrations, e.g. if a football bounces nearby
 - USB-C connection for operating the lock in case the battery is flat when the lock is closed
 - Storage of the bike's last parking location
 - LED status display

Operation and use

- Very good protection for a higher theft risk
- Recommended for securing high-value two-wheelers
- Convenient opening with a fingerprint or via app
- When folded, the lock is compact and easy to transport
