

PERFECT FIT, PERFECT PROTECTION

Our Dapteo safety glasses offer you reliable eye protection - even if you wear your prescription glasses at work.

Dapteo safety glasses protect your eyes when you are exposed to hazards such as dust, dirt, flying objects such as splinters or other particles at work. A special coating surrounds the robust polycarbonate lens and prevents scratches and fogging from the inside and outside.

Thanks to their large inner volume, Dapteo safety glasses also fit easily over prescription glasses - ideal for spectacle wearers.

Comfort is a top priority with these safety glasses. The temples are made of hard-wearing polycarbonate and covered with soft, thermoplastic rubber, which provides additional impact protection. The length- and tilt-adjustable temples allow you to optimally adjust the glasses to your head size and shape, which prevents them from slipping and ensures that there are no pressure points behind the ears.

The Dapteo safety glasses combine maximum protection with first-class comfort and are the ideal choice for anyone who wants to protect their eyes at work without having to do without their prescription spectacles.

Technologies

- Effective lens design: Robust wide angle lens with 180° view ensures an unrestricted field of vision, large inner volume offers sufficient space to wear the Dapteo safety glasses comfortably over normal glasses
- Robust material: Clear PC lens (PC = polycarbonate) offers reliable protection and all-round vision at the same time, UV protection 99.99%, antistatic
- Innovative safety glasses technology: ABUS Premium VisiLens coating, which means that the safety glasses are extremely scratch-resistant and remain permanently fog-free (inside and outside); NK-certified, shock-absorbing, high impact resistance
- Optimum fit: Frame and temples made of durable polycarbonate with soft thermoplastic rubber offer ultimate impact protection and high comfort, flexible temple length and tilt adjustment, non-slip and ergonomically
