

PROTECTED WITHOUT DRILLING

External window blind lock with easy mounting and convenient operation.

Roller shutters can often simply be pushed up. Burglars or stalkers thus have an easy game. Therefore, protect yourself and your home with a reliable security system for your roller shutters. The fuse is supplied in pairs and is fitted on the right and left from the inside between the roller shutter and the guide rail. An additional screw provides the necessary tension. There is no need to drill into the window frames or slats for assembly.

Technologies

- Two clamps connect between the slats and guiding rail, and are secured with a screw

Operation and use

- Window roller shutters - protection at night time
- Easy to operate
- Temporary fixing: Can be also used at holiday resorts

Technical data - RS97
