

Door lock JC5100A NESSA

Seite 1 von 2

KEEPS DOOR AND WINDOW OPEN

Our hinge lock NESSA is an all-round talent!

Simply hooked onto the hinge of the door or window, NESSA prevents doors and windows from suddenly slamming shut due to a gust of wind, for example.

This prevents toddlers and babies from getting trapped in the door or window and possibly injuring themselves.

Tip: If you purchase the optionally available counterpart, you can attach our NESSA hinge lock to any position on the door and window frame.

Technologies

- The flexible plastic material reliably dampens the closing of doors or windows without damaging them
- Easy and residue-free installation: the lock is hung on the hinge of the door or window
- Alternatively the hinge lock can be placed in any position on the door or window frame using the counter component (included in the scope of delivery)

Operation and use

- Holds doors and windows open preventing fingers becoming trapped
