

Integrated function test

Optical smoke alarm with large test button that reliably registers smoke development and sounds the alarm loudly.

A smoke detector is part of the basic equipment of your home. This device warns you reliably when smoke develops. A big plus in terms of safety. As soon as smoke enters the room chamber inside the detector, an 85 decibel alarm sounds. The product is suitable for use in rooms up to 40 square metres in size and is tested according to DIN EN 14604. The large test button makes it easy to check the functionality of the product.

Technologies

- CE according to EN 14604
- 3V lithium battery
