Frame for 2 modules for surface mounting (stainless steel)

ABUS
Security Tech Germany

TOTAL MODULAR: THE VIDEO INTERCOM SYSTEM

See people in front of the door, talk to them, open the door. Modularly adaptable to any building and easy to install - with the appropriate installation frame.

Installed on plaster: Your ModuVis installation
When installing ModuVis modules (video module, bell button module, etc.), you can choose between surface and flush mounting. And you can choose between a single installation frame (for 1 module), a double and triple frame (for 3 modules). This installation frame is suitable for surface mounting of 2 modules.

Totally modular, extensively expandable
A clear advantage: depending on the number of flats or living areas and local requirements, modules are simply added to the system, e.g. info module with name plate, bell button module or numeric keypad for keyless access via PIN code. If 2 modules are set, the 2-fold installation frame is the first choice. If further modules are planned but are not yet set during the initial installation, a larger frame (3-fold) can be selected and the unoccupied part can be covered with an empty module (blind cover).

Technologies

- Double frame for surface mounting
  for the ModuVis door intercom system
- Weatherproof housing

Frame for 2 modules for surface mounting (stainless steel)

Technical data - Frame for 2 modules for surface mounting (stainless steel)

Dimensions	107 x 219 x 37 mm
Height	219 mm
Length	37 mm
Material	Front: Stainless Steel / Back: Eloxiertes Aluminium
PSTI conformity required	No
Width	107 mm
