PROTECTED ALL AROUND

With the AirDrop, ABUS offers its first full-face helmet that provides the best protection even for your most daring jumps.

Enduro racers, downhillers, E-MTB riders and alpine adventurers are always pushing the limits of mountain biking. Increased protection used to mean heavy, hot and claustrophobic full-face helmets. New technologies like our EVA collarbone protector inserts, breakaway visor attachments and side communication channels bring real benefits to bike parks and the backcountry. The QUIN version of our AirDrop offers the certainty that you are never alone on the trails. Because in the event of a fall, the smartphone sends a call for help to emergency contacts that you've previously defined. If gravity is the thrill you need, the AirDrop is the MTB helmet for you.

Technologies

- In-mould manufacturing for a durable connection to the outer shell with shock-absorbing helmet material (EPS)
- Zoom Ace FF: Adjustment system to fit the head circumference
- Collarbone protection edges
- State-of-the-art QUIN technology: Integrated acceleration sensor that detects and measures falls. In the event of a fall, the system notifies a pre-defined contact person
- Breakaway visor bolts
- Ambient Sound Channels (ASC) increase spatial awareness
- Breathable cheek pad inserts
- Design suitable for spectacles
- Double D-ring buckle system
