CLIPPED AND MADE VISIBLE

Flashing or steady light: Our LED light can be flexibly attached almost anywhere there is a loop with the Velcro fastener.

Poor visibility? No matter whether it's rain, snow, hail or because it's autumn, winter or dark night? Then clip the Lumino Indicator Light to your backpack or jacket and swing onto your bike. And the practical Velcro fastener not only holds well, but also allows the LED light to be transferred onto your other favourite backpack or other piece of clothing for great visibility the next day, too. Tip: To further increase safety in road traffic, attach the Lumino Indicator Light to the tab on the back of our Lumino Reflex and Lumino Urban safety vests. This means you are always clearly visible when commuting by bike - whether on the way to work or in your free time.

Technologies

- Continuous and flashing light function at the touch of a button
- Incl. replaceable battery CR2032
- High-quality high-gloss material, yellow with 4 red, powerful LEDs
- With practical Velcro fastener for attaching to various objects
- Light lasts up to 100 hours
- Suitable for rainy weather thanks to fully welded-in, waterproof exterior

Operation and use

- Provides additional safety at night, at dusk and in other poor visibility conditions
- Easy attachment to eyelets and openings thanks to Velcro fastener
