STYLISH AND SAFE

The Lumino Night Vest by ABUS proves that these two qualities go together.

With the Lumino Night Vest, you are guaranteed to be seen in road traffic even in the darkest night. This is ensured by an integrated rear USB light, several reflective silver elements and the yellow signal colour. With the red rear light, which contains four powerful LEDs, you are highly visible even from behind. It has two light modes (steady and flashing) and can be conveniently charged via a mini-USB cable. Thanks to the strong luminosity of the Lumino Night Vest, you will be seen within a radius of 150 metres at night and at a distance of 100 metres during the day, even after years of use. The back of the vest is longer and a smooth-running branded zip at the front ensures maximum comfort. In addition, a zipped chest pocket provides ideal storage space for small items such as keys and mobile phone. In addition, the Lumino Night Vest is tested according to the European standard EN 1150:1999.

Technologies

- 100% polyester
- Silver applications light up as soon as light hits them
- UV-resistant material glows even after years of use
- Visibility of 150 metres at night and 100 metres during the day
