The steel cable for all cases

Protect your bicycle helmet, pram, barbecue and many other items from thieves. The Multicombiloop 215 offers the solution.

Many people think about securing their bike, but not the accessories or other items. But thieves strike everywhere. The practical and flexible steel cable can be used to secure many objects thanks to its length of 1.85 metres. There is even the possibility of a double loop, through which you can connect several items at once. The synthetic coating prevents scratches on the objects to be secured. If you want to secure your accessories, for example a helmet or skis, while on the move, you don't even have to think about a key. The lock opens via an individually resettable number code. This way you also protect yourself from theft.

Technologies

- 8 mm strong premium steel cable
- Synthetic coating to prevent damage to the bicycle's paintwork
- Integrated adapter in the body for a conversion from one loop to a double-loop cable
- Individually settable code

Operation and use

- Good protection at low theft risk
- Recommended for securing entry level bicycles or high-value accessories
- Multi-purpose application for garden, home, leisure activities and work
- Through variable adjustable loops, the attachment on stable objects or the connection of various objects is highly
