

GUARDIAN ANGEL FOR YOUR BIKE

With the Steel-O-Flex™ Millennioflex 896, you gain more security - and more flexibility in terms of scope for locking your bike.

17mm thick, overlapping steel shells encase the inner steel cable, providing you with double protection against theft. But the Steel-O-Flex™ Millennioflex 896 Cable Lock offers more: The key components are made of specially hardened steel and make it incredibly difficult for thieves to break open the lock. And if you connect two Steel-O-Flex™ Millennioflex 896 Cable Locks from a twin set together, you can secure several bikes at once with a total usable length of 170cm.

Technologies

- 17 mm thick, overlapping steel shells protect the internal steel cable
- PVC coating prevents damage to the bicycle's paintwork
- The shells, body and the structural parts of the locking mechanism are made of specially hardened steel
- ABUS Extra Classe cylinder with coded reversible key
- Two keys are included in the scope of delivery

Operation and use

- Good protection at medium theft risk
- Recommended for securing good bicycles

Tips

- The Millennioflex 896 is also available as a twin set with two keyed-alike locks which can be combined to achieve

Millennioflex 896/85 EC KF

a total usable length of 170 cm

- Due to the steel shells, the Steel-O-Flex™ locks reach a significantly higher security than common cable locks, yet maintaining high flexibility (Double Protection)
- The lock can be ordered keyed alike with other locks, all of which are operated using the same key or locking method
