ENSURING THE SAFE PORTABILITY OF LOTO KITS

Making workplaces safer

An ideal solution to have everything at hand at all times

The Importance of LOTO

Lockout and Tagout (LOTO) is a safety measure to ensure dangerous machinery and energy sources are properly shut off and not unexpectedly started up before the completion of maintenance or servicing work. LOTO procedures are used to prevent work accidents during maintenance or service work on heavy machinery.

The Importance of Portable LOTO

LOTO bags and kits offer compact and effective solutions when safety kit is required in construction projects or maintenance and repair of machinery outside, or in other inaccessible locations. LOTO bags are an essential purchase for anyone using lockout in multiple locations as a simple solution to moving equipment around.

About ABUS LOTO Bags and Kits

ABUS offer LOTO bags in two sizes (small and large) along with recommended kits as an ideal solution to always have everything at hand such as when working outside or at height. The featherweight bags are easily attached to a work belt thanks to the loop on the back. The use of LOTO bags ensures that all safety locks and latches are easily accessible and can be stowed away again.

The small kit includes safety padlocks, safety device circuit breaker, safety hasp, LOTO tag dispenser and a perfectly sized bag to contain all these items. The larger kit is perfect for use in manufacturing environments, energy industries or construction sites and contains additional gear such as a universal ball lockout set, Safeflex™ cable, safety motor protection lockout device, safety plastic lockout hasp and padlock cable shackle. ABUS is happy to advise and develop a custom-fit kit to meet any specific safety requirements.

The featherweight ABUS LOTO bags in two sizes are worn on the belt thanks to the loop on the back.

Kit Bag – Small

ABUS UK | LOTO Tagout Kits

Why use ABUS LOTO Bags and Kits?

- ABUS LOTO bags are suitable for accessories such as safety locks, Safelex™ cables, tags and other interlocks
- Bags available in two sizes (small and large)
- Lightweight material (polyester) with a polyurethane coating
- The bags are extremely flexible, water-repellent and resistant to heat and dirt
- 2-way zip and belt loop on the back

ADDED VALUE: The ideal solution to always have everything at hand – **ABUS would be delighted to configure the perfect set for individual requirements.**

Kit Bag – Large

LoTo Kit Bag – Complete SMALL – Order Number: 0500965
