

KEYLESS IS MORE

Enjoy the benefits of the innovative SmartX cylinder, which offers both security and convenience: you no longer need keys - just a smartphone in your pocket.

Combined with the loud 100 dB alarm, this lock provides security for high-value bikes such as e-bikes and cargo bikes. Thanks to integration with the ABUS One app and proven ABUS SmartX™ Bluetooth technology, operation of the bike lock is completely keyless.

For those who want something less smart but still convenient, the BORDO™ One 6500A can be optionally operated with the remote control. In the RC variant (RC = Remote Control), this is included in the scope of delivery; for the other variants, the remote control is available separately.

Technologies

- 5.5 mm thick bars, with extra-soft 2-component coating
- Easy operation via the ABUS One app (previously SmartX) – for iOS and Android
- Bike lock can be opened and locked without a key – keyless function based on proven ABUS SmartX™ Bluetooth® technology
- Alarm function with min. 100 dB for 15 seconds, then automatic re-arming
- 3D position detection – detects vibrations and the smallest of movements in all three dimensions and triggers an alarm
- Smart alarm – the lock only emits a short warning tone in the event of minor and brief vibrations, e.g. if a football bounces nearby

BORDO™ One 6500A/110 black + bracket SH

Security Tech Germany

Seite 2 von 2

- USB-C port
- Storage of the bike's last parking location
- LED light indicates battery and charging status
- RC variant can be operated via included remote control (for all other variants, the remote control is available separately)
