

AirDrop MIPS velvet black S | M

Seite 1 von 2

FOR WHEN THINGS GET GNARLY

The AirDrop MIPS is the helmet for days when a half-shell won't cut it. Sessions in the bike park, riding big lines in the back country or enduro racing are all the domain of the AirDrop MIPS

Increased protection used to mean heavy, hot and claustrophobic full-face helmets, but not with the AirDrop MIPS. New technologies like our EVA collarbone protection inserts, breakaway visor attachments and side communication channels bring real benefits to bike parks and the backcountry.

Technologies

- In-mould manufacturing for a durable connection to the outer shell with shock-absorbing helmet material (EPS)
- Zoom Ace FF: Adjustment system to fit the head circumference
- Collarbone protection edges
- QUIN ready - easy upgrade with the separately available QUIN chip
- Breakaway visor bolts
- Ambient Sound Channels (ASC) for improved hearing.
- Breathable cheek pad inserts
- Design suitable for goggles
- Double D-ring buckle system
- Ventilation: excellent ventilation through 11 air inlets and 6 air outlets
