THE ROCK-SOLID PADLOCK

The Rock 83/70 provides reliable protection against unauthorised access and theft. It is extremely robust and flexible thanks to the interchangeable cylinder. This is what effective protection looks like for high-value goods and objects:

The padlock owes its rock-like resistance to attempts to break it open by pulling or drilling to its solid lock body made of hardened special steel, from which the sturdy shackle is also made. The corrosion-resistant 83/70 Rock padlock secures goods in warehouses and behind factory gates, for example.

The interchangeable cylinder enables adaptation to existing bittings so that key management can be optimised. If you choose the keyed alike solution, our specialist dealers will gladly help you implement this.

What is more, the lock body of the Rock 83/70 is designed so that it can accept standard Euro profile half cylinders, Scandinavian oval cylinders or the ABUS figure-8 cylinder, depending on the version.

For more flexibility at the place of use, the lock is also available in a variant with a completely removable shackle.

According to the European padlock standard EN12320, this high-security lock achieves security class 5 out of 6.

Technologies

- Lock body and shackle made of hardened special steel
- Hardened special steel shackle with NANO PROTECT™ coating for very high corrosion protection
- Double bolted locking mechanism increases the security of the lock

83/70 EPZ without conventional cylinder

- Rekeyable: the cylinder can be exchanged and thus also adapted to existing bittings
- Optionally available with fully removable shackle
- SSF014 Class 4 / EN12320 Class 5
- Protected against drilling or pulling
- Version “0”: accepts commercially available oval cylinders
- “EPZ” version: accepts standard Euro profile half cylinders
- “Figure 8” version: accepts all cylinders from the ABUS 83 series

Use and application

- Protection of items of high value and with a very high risk of theft
- Suitable, among other things, for securing industrial or company gates, warehouses, trailers, containers and garages
- Extremely flexible: can be adapted to different requirements in a short time – thanks to its interchangeable cylinder and the possibility to quickly change the shackle

Technical data - 83/70 EPZ without conventional cylinder

Depth e	30 inch
Height f	128 inch
Horizontal clearance b	29,5 inch
Keyed alike	Yes
Security Level Home Security	10
Shackle diameter d	15 inch
Vertical clearance c	38,5 inch
Weight [lbs]	1205 lbs
Width a	70 inch
color	silver
